

*Reliance Seeds
is a Breeder, Producer,
Distributor for high quality
vegetable seeds.
We are committed to develop
high quality varieties
which is disease resistant
and adaptable to
various zones.*

**Tomato
Sam1**

TYPE : Determinate round big tomato suitable for open field culture for fresh market use

SEGMENT : Cold to hot

MATURITY : Very early

PLANT : Good vigor plant with wide leaves and good cover and short internode

FRUIT : Globe shape, nice red color

SIZE : 180-220 g. / fruit, firm and uniform

TOLERANCE : TYLCV, VF 2

FEATURES : Very early, very productive with nice quality, concentrate yield, high setting

**Tomato
Sandra**

TYPE : Semi determinate round big tomato, suitable for open field for fresh market use segment

SEGMENT : Hot to cold and cold to hot

MATURITY : Early

PLANT : Very vigor high plant with good cover and wide leaves good habit

FRUIT : Globe shape, nice red color

SIZE : 180-200 g. / fruit, firm, keep calyx

TOLERANCE : TYLCV, VF 2

FEATURES : Very good firm, high productive high quality, very vigor, could work for half stake culture

Tomato **Magic**

TYPE : Determinate round tomato, suitable for planting in open field and low tunnel for fresh market

SEGMENT : Hot setting

MATURITY : Very early

PLANT : Very vigor, green healthy plant, good cover

FRUIT : Nice red color

SIZE : 40-170 g. / fruit, firm, round shape

TOLERANCE : TYLCV, VF2.Fol, TSWV

FEATURES : High productive, Very good firm high fruit quality, keep calyx, hot setting very early

Tomato **Renas**

TYPE : Determinate round, suitable for open field for fresh market use

SEGMENT : Hot to cold and cold to hot

MATURITY : Early

PLANT : very vigor high plant with good cover and wide leaves good habit

FRUIT : Globe shape, uniform, Nice red color

SIZE : 160-180 g. / fruit, firm, keep calyx

TOLERANCE : TYLCV, VF2

FEATURES : Very good firm, high productive high quality, very vigor, Uniformity

Tomato

Masa

Tomato
Masa

TYPE : Determinate saladate tomato, suitable for planting in open field for fresh market and processing

SEGMENT : Cold to hot

MATURITY : Early

PLANT : Vigor, good cover, short internode

FRUIT : Nice red color

SIZE : 140-160 g. / fruit. Saladate blocky elongated, uniform, firm, uniform back, keep calyx

TOLERANCE : TYLCV, VF2, V.

FEATURES : High productive, Very good firm, high marketable quality

Tomato

Daimond

TYPE : Determinate saladate, suitable for open field culture for fresh market and processing use

SEGMENT : Cold to hot

MATURITY : Early

PLANT : Good vigor , high plant good cover, short internode

FRUIT : Nice red color

SIZE : 150 -170 g. / fruit, uniform oval shape, uniform back, firm, LSL

TOLERANCE : TYLCV, VF2

FEATURES : High productive, Very good firm, good habit plant and good cover.

Tomato
Daimond

Tomato

Suher

TYPE : Determinate saladate tomato, suitable for planting in open field for fresh market and processing use

SEGMENT : Cold to hot

MATURITY : Early

PLANT : Very vigor, green healthy plant good cover

FRUIT : Nice red color

SIZE : 160-180 g. / fruit, firm, oval shape

TOLERANCE : TYLCV, VF2

FEATURES : High productive, Very good firm high fruit quality

Tomato

Demand

TYPE : Determinate saladate (square round) tomato, suitable for planting in open field for fresh market

SEGMENT : Hot to cold and cold to hot

MATURITY : Early

PLANT : Vigor, good cover, short internode Compact plant

FRUIT : Nice red color

SIZE : 150-180 g. / fruit. Square round, uniform, firm, uniform back, keep calyx

TOLERANCE : TYLCV, VF2

FEATURES : Very productive, Very good firm high marketable quality

Tomato
Sanad

Tomato **Sanad**

TYPE : Determinate saladate (square round) tomato, suitable for planting in open field for fresh market and processing

SEGMENT : Cold to hot and hot to cold

MATURITY : Early

PLANT : Vigor, good cover, short internode

FRUIT : Nice red color

SIZE : 150-180 g. / fruit. Saladate blocky elongated, uniform, firm, uniform back, keep calyx

TOLERANCE : TYLCV, VF2

FEATURES : Very productive, Very good firm high marketable quality

Tomato **Suzana**

TYPE : Determinate square round tomato suitable for planting in open field and low tunnel for fresh market

SEGMENT : Hot setting

MATURITY : Early

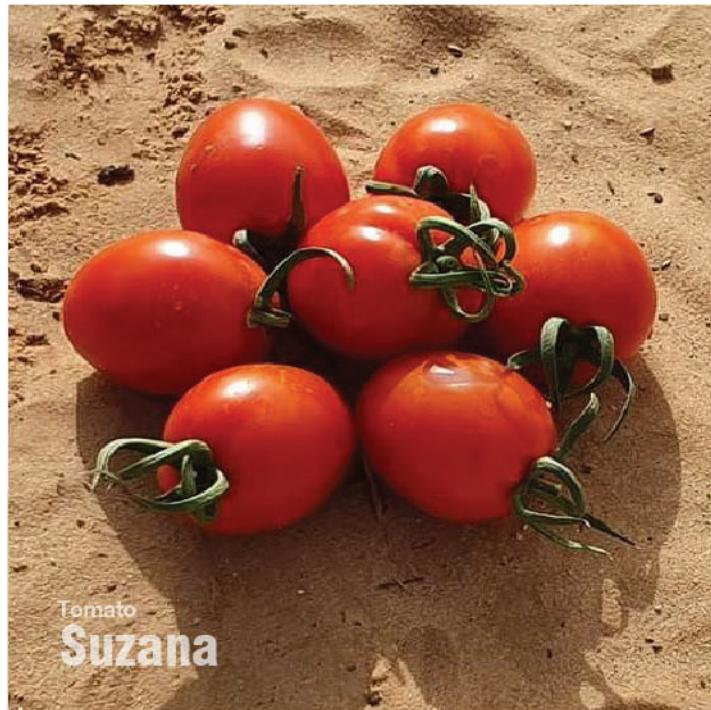

PLANT : Very vigor, green healthy plant good cover

FRUIT : Nice red color

SIZE : 110-130 g. / fruit, firm, square round shape

TOLERANCE : VF2

FEATURES : High productive, Very good keep calyx, very early, high fruit quality

Tomato
Suzana

Tomato
Dana

TYPE : Indeterminate round tomato suitable for indoor for fresh market use

SEGMENT : Long season.

MATURITY : Early

PLANT : Good vigor and open plant

FRUIT : 4-6 fruits per cluster, deep globe shape

SIZE : 160-180 g. / fruit, keep calyx, nice red color and firm.

TOLERANCE : TYLCV, VF2.Fol

FEATURES : Nice red, firm, High setting

Tomato
Demas

TYPE : Indeterminate round big tomato

Suitable for indoor and stake

SEGMENT : Long season

MATURITY : Early

PLANT : Good vigor plant, medium internode

**Tomato
Demas**

FRUIT : 4-6 fruits per cluster, Deep globe shape

no cracking and firm keep calyx

SIZE : 200-220 g.

TOLERANCE : TYLCV, VF2

FEATURES : Very good fruit setting, high yield
vigor plant, suitable for long season

Tomato
Tania

TYPE : Indeterminate Saladate tomato
suitable for indoor For fresh market use

SEGMENT : Saladate - long season.

MATURITY : Early

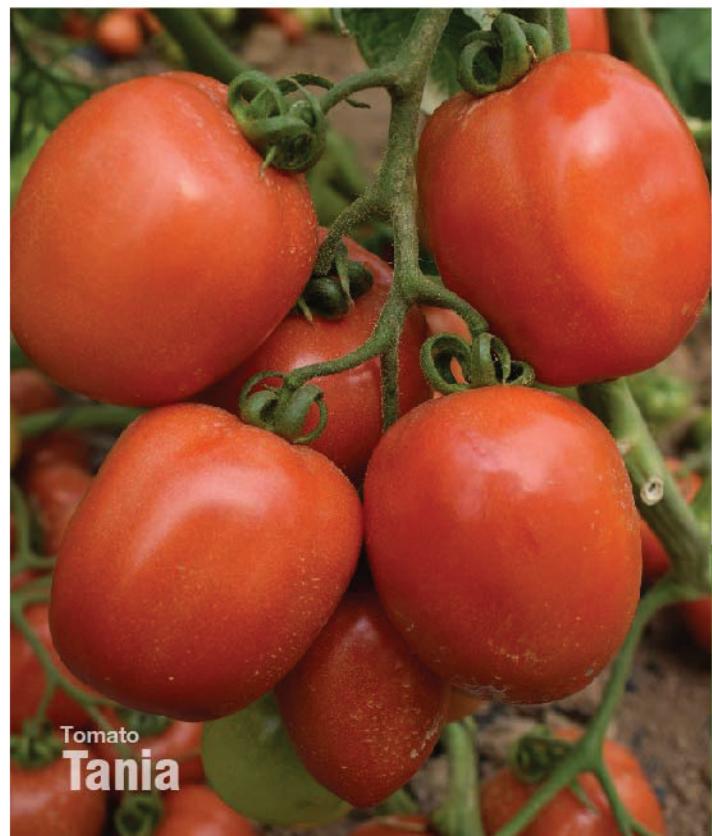

PLANT : Good vigor and open plant

FRUIT : 5-8 fruits per cluster, oval shape

SIZE : 150-170 g. / fruit, keep calyx, nice
color and firm

TOLERANCE : VF2

FEATURES : Nice red, firm

Tomato
Rania

PLANT TYPE : Tall Determinate

FRUIT : Oval, 90-100 gms.

TOLERANCE : TYLCV, Nematodes, Mild BWT

SUITABLE FOR : Dry and Rainy season

REMARKS : A new very prolific Hybrid

Tomato
Jenan

PLANT TYPE : Tall Determinate

FRUIT : Oval, 100-110 gms

TOLERANCE : TYLCV, Nematodes, BW

SUITABLE FOR : Any season tolerant to heat

REMARKS : Big fruit size, prolific

Tomato

RSM-098

PLANT TYPE : Tall Determinate

FRUITS : Oval, 100-120 gms.

TOLERANCE : BW Tolerant, TYLCV Tolerant

SUITABLE FOR : Dry and Rainy season

REMARKS : High yielding variety, firm fruits

Tomato

RSM-099

PLANT TYPE : Tall Determinate

FRUITS : 80-90 gms. Very prolific

TOLERANCE : Heat Tolerant, BW Tolerant

SUITABLE FOR : All season

REMARKS : Suitable for Myanmar

Tomato
RSM-058

PLANT TYPE : Tall Determinate

FRUITS : 80-90 gms.

TOLERANCE : BW, TYLCV & Early blight tolerant

SUITABLE FOR : Dry and Rainy season

REMARKS : Suitable for fresh and processing

Tomato
RSM-019

PLANT TYPE : Tall Determinate

FRUITS : Oval, 100-110 gms.

TOLERANCE : Tolerant to BW and TYLCV. **REMARKS** : In high temperature also bear fruits

Tomato

RSM-020

PLANT TYPE : Tall Determinate

FRUITS : 100-120 gms

TOLERANCE : TYLCV, BW and Nematodes.

Tomato
RSM-020

SUITABLE FOR : All season

REMARKS : Good adaptability in poor to rich soil. Oval size very firm fruits.

Tomato

RSM-021

PLANT TYPE : Tall Determinate

FRUITS : Oblong 100-120 gms.

TOLERANCE : Virus and BW tolerant variety

SUITABLE FOR : All season

REMARKS : Bear 8-9 fruits per cluster and very firm fruits

Tomato
RSM-021

Sweet Pepper

Kontry

TYPE : Lamoyo Sweet pepper thin wall suitable for planting in open field, low tunnels and plastic houses

SEGMENT : Lamoyo Thin Wall

MATURITY : Early

PLANT : Vigorous plant and high setting in cold condition

FRUIT : Diameter : 5-6 cm. / Length : 8-12 cm.

COLOR : green glossy, 3-4 loops

FEATURES : High setting in cold

Sweet Pepper

Kontry

Hot Pepper

Force

TYPE : conical long Yellowish Hot Pepper suitable for planting in open field low tunnels and plastic houses

SEGMENT : Yellowish type (Charli hot)

PLANT : Vigorous plant and high setting in early stage

MATURITY : Early

FRUIT : Diameter : 2-3 cm. / Length : 18-22 cm.

COLOR : Yellowish 3 loops

FEATURES : High Pungency, high setting in cold

Hot Pepper

Force

Hot Pepper
Bolton

TYPE : Conical long Yellowish Hot Pepper suitable for planting in open field, low tunnels and plastic houses

SEGMENT : Yellowish type (Charli hot)

MATURITY : Early

PLANT : Vigorous plant and high setting in early stage.

FRUIT : Diameter 2–3 cm. / Length 18-24 cm.

COLOR : Yellowish, 2 loops

FEATURES : High Pungency, high setting in cold

Hot Pepper
World

TYPE : Hot pepper green pencil type.

SEGMENT : Suitable for planting in open field low tunnel and plastic house

MATURITY : Early

PLANT : Vigorous, compact green healthy plant

FRUIT : Diameter 1.5-2 cm. / Length 16-18 cm.

COLOR : Dark Green and turn Red color.

FEATURES : High Pungency, good cold setting

Cucumber
Lord

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Spring and summer

MATURITY : Early

PLANT : Medium vigorous plant with short branches, open habit

FRUIT : 2-4 fruit / node on main stem and branch, 16-18 cm. with nice ribbed

TOLERANCE : PM and DM

FEATURES : Productive with High quality open habit

Cucumber
Sam

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Spring and summer

MATURITY : Medium early

PLANT : Medium vigorous plant with short det branches open habit

FRUIT : 3-4 fruit / node on main stem and branch, 16-20cm. with nice ribbed

TOLERANCE : PM and DM

FEATURES : Very high productive in summer with nice fruit quality, with good balance between generative and vegetative growth

Cucumber
Lionard

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Spring and summer

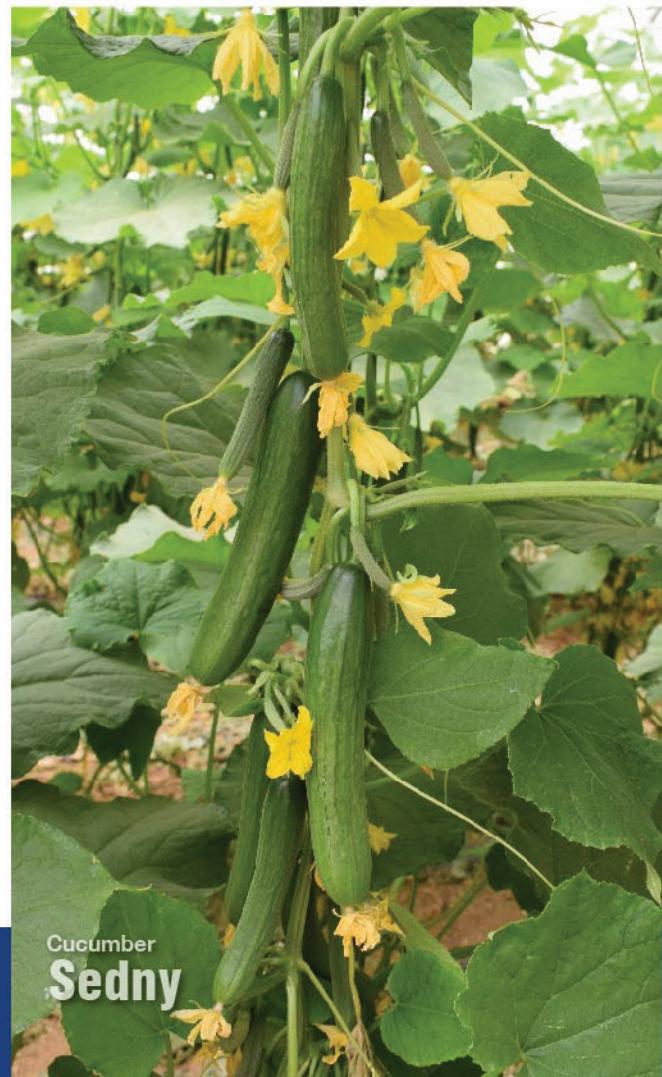

MATURITY : Medium early

PLANT : Good vigor with multi short branch

FRUIT : 2-4 fruit / node on main stem and branch, 17-21cm with nice ribbed

TOLERANCE : PM and DM

FEATURES : Productive with High quality, long fruit

Cucumber
Sedny

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Summer and spring and autumn

MATURITY : Medium early

PLANT : Vigorous plant with many short branches

FRUIT : 2-3 fruit / node on main stem and branch, 15-18 cm. with nice ribbed

TOLERANCE : PM and DM

FEATURES : Vigor plant and multi det branchy

Cucumber

Spaider

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Summer and Autumn

MATURITY : Medium early

PLANT : Very vigor with multi short branch

FRUIT : 2-4 fruit / node on main stem and branch, 17-20 cm. with nice ribbed

TOLERANCE : PM and DM and yellowing viruses

FEATURES : Productive with High quality, long fruit, Keep green healthy plant

Cucumber

Spaicy

Cucumber
Spaicy

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Summer and Autumn

MATURITY : Medium early

PLANT : Very vigor with multi short branch

FRUIT : 2-4 fruit / node on main stem and branch, 17-21 cm. with nice ribbed

TOLERANCE : PM and DM and yellowing viruses

FEATURES : Productive with High quality, long fruit, Keep green healthy plant

Cucumber

Sorento

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Winter

MATURITY : Medium early

Plant : Very vigorous plant with multi long branches

PLANT : 1-2 fruit / node on main stem and branch, 16-18cm with nice ribbed

TOLERANCE : PM and DM

FEATURES : Very high productive in winter, with nice fruit and good recovery and good tolerance to cold condition

Cucumber
Sorento

Cucumber
RSCP-09

TYPE : ALL female 100%, suitable for open field

SEGMENT : Summer open field

MATURITY : Early

PLANT : Vigorous Healthy plant

FRUIT : 2-3 fruit / node on main stem and branch, with nice ribbed

TOLERANCE : PM and DM

FEATURE : Good setting, Tolerance to stress condition

Cucumber
RSCP-10

TYPE : ALL female 100%, suitable for open field

SEGMENT : Summer open field

MATURITY : Early

PLANT : Vigorous Healthy plant

Fruit : 2-3 fruit / node on main stem and branch, with nice ribbed

TOLERANCE : PM and DM

FEATURES : Good setting, Tolerance to stress condition

Cucumber
Rodrik

TYPE : Parthenocarpic 100% suitable for indoor culture

SEGMENT : Spring summer and autumn

MATURITY : Early

PLANT : Vigorous plant with many det. branches.

FRUIT : 3-4 fruit / node on main stem and branch, with nice ribbed, Baby cucumber 8-10 cm.

TOLERANCE : PM and DM

FEATURES : Baby cucumber For pickling and snack use

Zucchini
Drank

TYPE : Cylindrical bulbous shape

SEGMENT : Open field, low tunnels

MATURITY : Early

PLANT : Vigorous green healthy plant, short internode, no silver

FRUIT : Cylindrical bulbous around 15-17 cm. long, mottled light green fruit

TOLERANCE : ZYMV, WMV2, PM.

FEATURES : Early productive, nice quality, Keep flower attachment

Zucchini

Jobiter

TYPE : Club shape

SEGMENT : Open field, low tunnels

MATURITY : Early

PLANT : Vigorous green healthy plant, short internode, no silver

FRUIT : Club shape around 13-15 cm. long, mottled light green fruit.

TOLERANCE : ZYMV, WMV2, PM.

FEATURES : Early productive, nice quality

Zucchini

Sobaro

Zucchini

Sobaro

TYPE : Long cylindrical eskandarani type

SEGMENT : Open field, low tunnels

MATURITY : Early

PLANT : Vigorous green healthy plant, short internode, no silver

FRUIT : Long cylindrical around 17-18 cm. long, mottled light green fruit

TOLERANCE : ZYMV, WMV2, PM.

FEATURES : Early productive, nice quality

Zucchini
Halk

TYPE : Squash Hybrid in Cylindrical Grizinni type

SEGMENT : Open field, low tunnels

MATURITY : Early

PLANT : Vigorous green healthy plant, short internode, no silver

FRUIT : Long cylindrical around 17-18cm long, Green with green blotches color

TOLERANCE : ZYMV, WMV2, PM.

FEATURES : Early productive, nice quality

Melon

Sweeter

TYPE : Ananas Orange flesh

SEGMENT : Open field and low tunnels

MATURITY : Early

PLANT : Vigor plant, good cover
healthy plant

FRUIT : Oval round, 2-3 kg. LSL, well netted,

small cavity, orange flesh, strong fruit attachment
nice quality

TOLERANCE : Fusarium wilt and Powdery mildew

Melon

Shaima

TYPE : Charantais Orange flesh

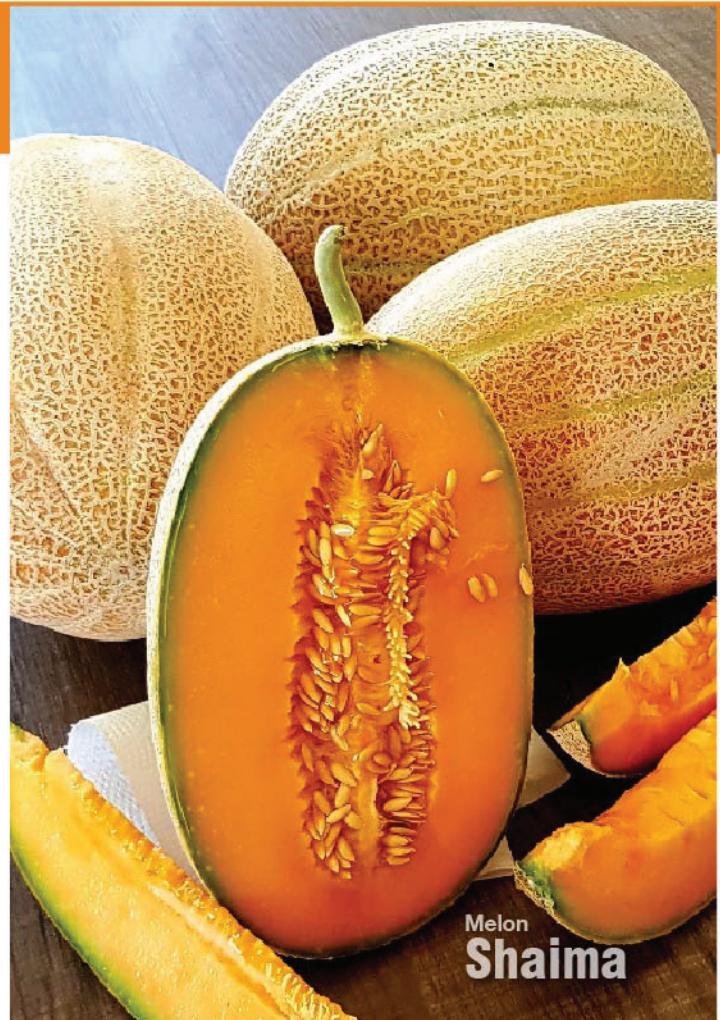

SEGMENT : Open field and low tunnels

MATURITY : Early

PLANT : Vigor plant, good cover, healthy plant

FRUIT : Oval round shape with green clear strip, 2-3 kg. LSL, well netted, small cavity, orange flesh, strong fruit attachment, nice quality

TOLERANCE : Fusarium wilt and Powdery mildew

Melon

Robina

TYPE : Galia

SEGMENT : Open field and low tunnels

MATURITY : Early

PLANT : Good vigor plant with good cover and very high setting

FRUIT : Round, greenish flesh, good taste and flavor, weight around 1 to 1.5 kg.

TOLERANCE : Fusarium wilt and Powdery mildew

Water Melon

Daiana

Water Melon

Daiana

TYPE : Charleston grey

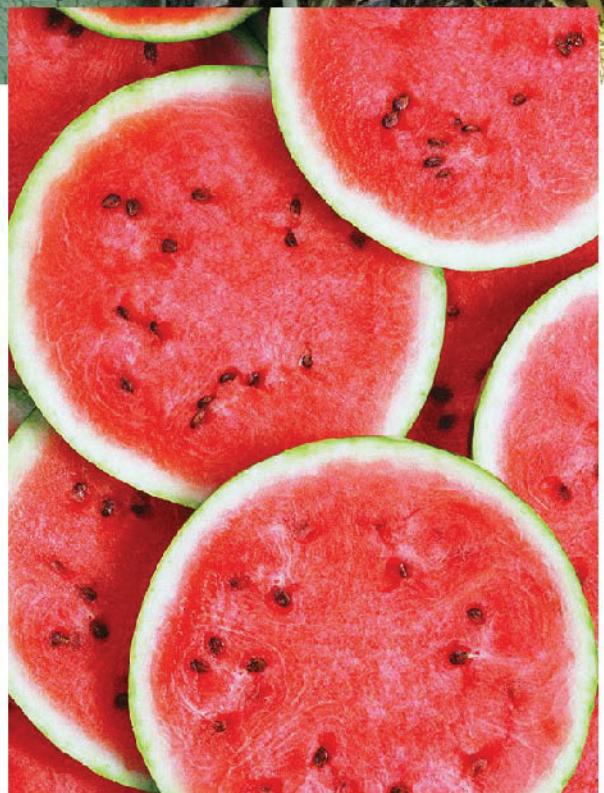

SEGMENT : Open field and low tunnels

MATURITY : Early

PLANT : Vigor plant, good cover healthy plant

FRUIT : Oval round (more to round) shape, white greenish color, crispy flesh, dark red color, 10-12 kg. nice quality.

TOLERANCE : Anthracnose and Powdery mildew
